

BROKER & WHITE-LABEL PROGRAM

Pricing & Commercial Terms

Brand the AlgoBars platform as your own and charge your traders whatever you want, and you keep **100% of the markup**. Your cost to AlgoBars is a flat **\$97/mo platform licence** plus two usage lines: per active account and per lot. Nothing else to itemize.

AlgoBars is a technology licensor, not a broker-dealer.

\$97

Platform licence per month.
Starts after the 30-day trial
or first live account.

\$3

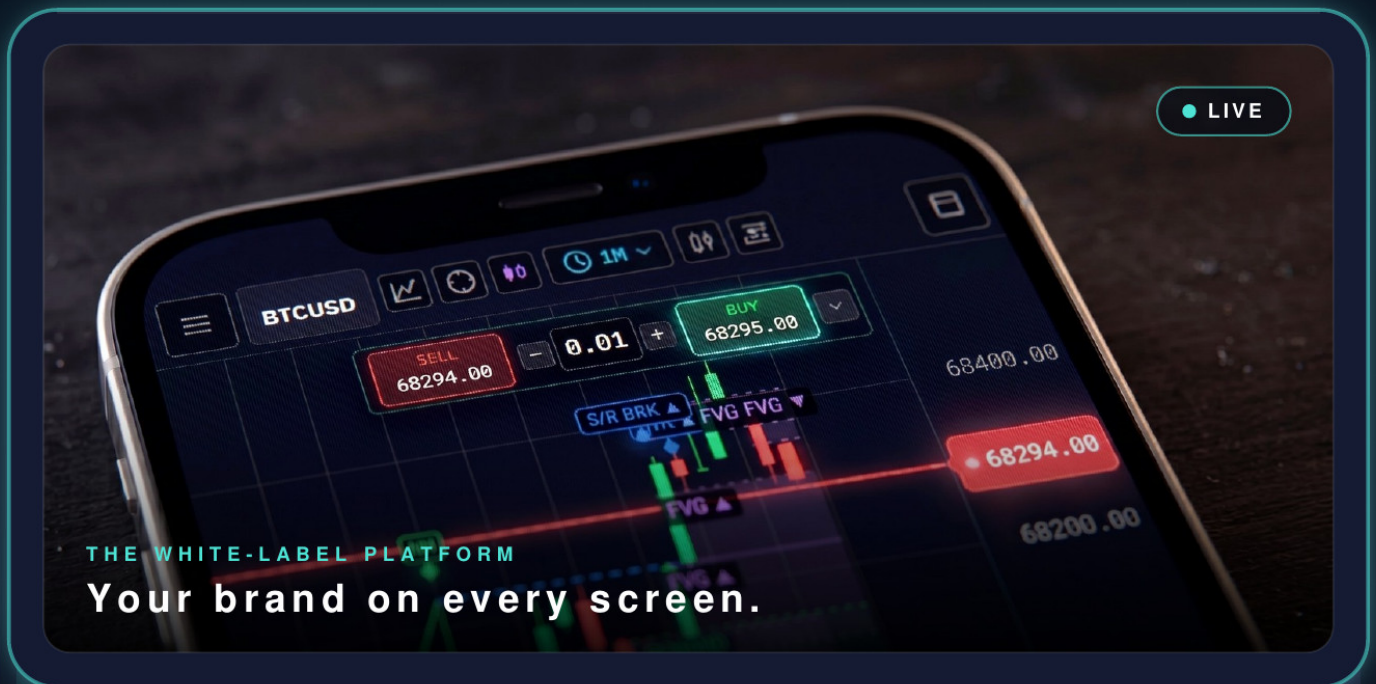

Per active account per
month, or its compute if
greater.

\$1

Per lot traded.
The second usage line.

100%

Of your markup stays with
you.

HOW IT WORKS

Brand it. Mark it up. **Keep everything.**

You run the brokerage and set every price your traders pay. AlgoBars charges you only what an account actually uses, so the rate-card is a flat licence plus two usage lines. There is no revenue share on top.

STEP 01

Brand & deploy

White-label the full platform and onboard your traders under your own name.

STEP 02

Charge any price

Set every subscription and fee yourself, and keep 100% of what you charge.

STEP 03

Pay the rate-card

A flat licence plus per-account and per-lot usage. Nothing else to reconcile.

YOUR COSTS · A FLAT LICENCE AND TWO USAGE LINES

SOFTWARE SERVER LICENSE · FLAT, BROKER-WIDE

The full white-label platform. One fee, unlimited accounts.

Begins after your 30-day free trial, or when your first live account is activated, whichever comes first. Billed monthly in advance.

\$97 / mo

PER ACTIVE ACCOUNT · MONTHLY

\$3 / mo

Or that account's compute, whichever is greater

Covers the full white-label platform plus every AI generation, trade signal, backtest and strategy run the account uses. Compute is metered automatically and built into the rate, so you never itemize a per-signal fee.

Most accounts sit at the \$3 floor. Heavy AI users simply pay their compute instead, never both.

PER LOT TRADED

\$1.00

Flat, per lot routed through AlgoBars

Charged on the trading volume your traders route through the platform. This is the only execution-side cost. The spreads, swaps and commissions you charge stay entirely yours.

Volume discounts apply automatically · \$0.75 at 1M+ lots/mo · \$0.50 at 5M+

That's the entire price.

No tiers, no per-signal fees, no separate data or AI charges. Just a flat \$97/mo platform licence, \$3 (or compute) per active account, and \$1 per lot. You keep 100% of whatever you charge your traders.

WHAT YOU GET

A full white-label brokerage, included.

Your licence and usage cover the entire platform. Every capability below ships in every deployment at no extra cost. Compute, AI and data are built into the per-account rate.

Regulatory positioning.

AlgoBars provides metered access to platform infrastructure as a **technology licensor**, not a broker-dealer or revenue-share partner. Fees are calculated on consumption and owed regardless of the Partner's own pricing, marketing or revenue model. The Partner is solely responsible for its retail pricing and end-user relationships.
